## ABOUT ME

I started my journey with programming in 2020. At first it was only a hobby, but by the end of 2021 it became my passion. I learnt almost everything on my own, I had to be disciplined, organized and creative. Lately I started working as freelancer in my spare time and now I decided to become programmer full time.

I have created my own website portfolio which you can check out now. I am still at the beginning of my career, but I learn fast and I believe I could be a real asset in your team. I would be happy to prove that on the interview!
